HW

Here are excerpts from the KPFA panel discussion on the Pentagon Papers, restricted to those bearing on the blank spot between the two assassinations, the absence of CIA documents, and the paucity of references to China. Only Schurman and Northwood can be identified by voice. Most of these excerpts are from the first day's program (1 hour), with a few from the second hour the next day. Since this was held during the court-ordered holdup of publication of the papers, it comes fairly early in the game, and we doubt whether there's much more of interest in it. However, we're holding the tape and can dub it if you think you need it.
